Design Guidelines

May 2019

Introduction

Purpose of these Design Guidelines

These Design Guidelines are in place to encourage the best possible housing design outcomes and to reflect the project vision at Harrisdale Green. Every lot purchaser is provided a copy of these Design Guidelines when signing their land contract. Please forward a copy to your builder/architect to ensure they are addressed in the design of your new home.

These Guidelines also reflect Cedar Woods' commitment to deliver sustainable communities and will help reduce your home's operating costs.

What happens first?

STEP 1

Decide on your builder, house type and facade. Ensure the builder has a copy of the Design Guidelines.

STEP 2

Complete the Building Design Approval Checklist with your builder as you review the house plans to ensure that all of the Design Requirements are addressed.

STEP 3

Have your builder send the completed (1) Builders Checklist (2) Site Plan (3) Elevations (4) Floor Plans (5) Material and Colour Schedule to Cedar Woods for design approval.

Note: You can send approvals directly to approvalswa@cedarwoods.com.au

STEP 4

Cedar Woods will review your application to ensure compliance. If your home design complies with the design standards, your plan will be approved and returned to you.

If your house design requires changes in order to comply with the design requirements, Cedar Woods will provide written advice detailing the areas of non-compliance and return the application to your builder for amendment and resubmission. Cedar Woods and/or your builder may be able to suggest ways to ensure compliance.

STEP 5

Lodge your Cedar Woods approved house design to your local government for building approval.

Application Requirements

The application requirements listed below allows Cedar Woods to thoroughly assess your house design to ensure that it achieves the best possible outcome for you and achieves the vision for Harrisdale Green.

All applications must be sent to:

Cedar Woods Properties Ltd
PO Box 788
WEST PERTH WA 6872

Or via email: approvalswa@cedarwoods.com.au

Important Notes

- Cedar Woods' Design Guidelines approval process does not constitute a local government planning or building license approval.
- Applications must contain all the required information as identified in the section 'Application Requirements'. Cedar Woods will not accept incomplete applications.
- Design approval will only be granted to an application as a whole. Conditional (partial) approval may only be granted where the colour selection remains to be made
- Design approval will only be granted in relation to the information that is detailed on the plans or otherwise submitted in your application. Any and all

changes to an approved plan or additional detail will need to be submitted to Cedar Woods for approval.

- In the case of a possible conflict between two or more standards, Cedar Woods will assess the outcome of such a conflict on its merits and general consistency with the intent of the Design Standards.
- The decision to approve an application is based on compliance with the Design Standards at the sole discretion of Cedar Woods.
- Prior agreement with the landscape design principles is required as part of your application. Qualification for Cedar Woods' free front

landscaping package is dependent on Cedar Woods' appointed landscape contractors confirming that these principles are complied with in your final landscape package.

Relationship to Local Government Planning

These Guidelines do not replace or override, but should be read in conjunction with, the statutory planning requirements of the City of Armadale, including its town planning scheme, local planning policies, any Detailed Area Plans / Local Development Plan, the Residential Design Codes and such other planning controls which may apply.

Builder Checklist for Design Approval

To apply for Design Approval, please complete and return the following form and attachments to: approvalsWA@cedarwoods.com.au

In accordance with the conditions of the Contract of Sale and Harrisdale Green Design Guidelines entered into with Cedar Woods, I hereby seek approval to the design and materials proposed to be used for the building as set out hereunder:

Applicant

Address

State

Postcode

Landowner

Name

Phone

Email

Address

State

Postcode

Property Details

Lot

Street Number

Street name

Builder or Homeowner Declaration

Signed

Date

Print name

All statements made in this application are true and correct. Applicants must demonstrate compliance with all the Design Guidelines in order to be eligible for fencing and landscaping rebates.

1. Facade Features

Is your facade articulated, (ie not flat) and contain a minimum of one of the following features? - refer page 7

Yes
 No

- Verandah (minimum depth 1.2m x 3.5m)
- Covered Portico/Porch extending from facade (1.2m deep)
- Contrasting rendered or face brick sills
- Gable/s
- Blade wall
- Balcony

2. Facade Materials

Does your design include the primary material for the façade as render, single brick, HardiePlank™ or any other materials considered by the developer based on merit.

Yes
 No

With the facade contrast feature to a min of 10% and max of 25% from the materials below? - refer page 7

- Single or 2c face brick
- Tiles
- Cladding - timber or stone
- Corrugated iron
- HardiePlank™
- Render

Note: 2 render colours only do not comply

3. Windows

Are all windows on the front facade clear glazed and of a rectangular proportion? - refer page 8

Yes
 No

Windows to toilets and bathrooms should not be visible from the street

- Awning
- Casement
- Sliding

Note: Roller shutters are not permitted on the front elevation windows. Or if a corner lot they are not permitted on the side elevation forward of the side boundary fence

4. Roof

Is your roof either a standard hipped roof with a minimum pitch of 25 degree?

Yes
 No

OR

A skillion design?

Roofs are to be of a corrugated metal sheet and to be of a light colour. Black or dark grey is not permitted, see attached colour palette.

Yes
 No

Note: Tiled roofs are not permitted in Harrisdale estate.

5. Door (Front)

Is the front door visible from the street and include any type of glazing or include a sidelight? Yes
 No

6. Corner Lots

Is it a corner lot? Yes
 No - Go to question 7

Does the primary street feature (i.e rendered finish) continue to the secondary street to at least 1.5m? Yes
 No

Does the secondary street elevation incorporate at least one window from a habitable room, in front of the boundary fence line? Yes
 No

7. Garages and Carports

Does your double garage accommodate at least 2 vehicles (minimum of 30m²) and include a sectional door? If a laneway, a carport with a sectional door will comply. Yes
 No

If a front loaded garage is it setback a minimum of 500mm from the front of the home? This does not include the verandah, porch, blade walls etc Yes
 No

8. Driveway and Crossover

Does the driveway and crossover include one of the following materials in a colour to complement the dwelling?
 Yes
 No
 By owner after handover

- Brick paving
- Exposed aggregate
- Limestone

Note: Grey or coloured concrete to driveways or crossovers are not permitted. If by owner, this will be confirmed before fencing and landscaping rebates are applied.

Note: Crossovers and garage levels to be in accordance with the City of Armadale

9. Letterboxes

If installing a letterbox it should be a pier format in a colour and material to complement the dwelling and guidelines.

Note: Novelty letterboxes are not permitted

- Yes
- No
- By owner after handover

10. Utilities

The following utilities are not to be on front elevation:

- Bin storage
- Meter boxes
- Air conditioning units
- Satellite dishes
- Solar hot water units
- Rainwater tanks
- TV antennae

- Yes
- No

All applications must include:

- (1) Builder Checklist
- (2) Site Plan
- (3) Elevations
- (4) Floor Plans
- (5) Material and Colour Schedule

All applications must be sent to:

Cedar Woods Properties Ltd
 PO Box 788
 WEST PERTH WA 6872

Or via email: approvalswa@cedarwoods.com.au

Design Guidelines

1. Façade Features

To create interest and give your home character, the façade must be articulated (not flat) and include a minimum of one of the following features:

1. Verandah (minimum depth 1.2m x 3.5m)
Wrap around for corner lots preferred
2. Covered Portico/Porch (minimum 1.2m)
3. Contrasting rendered or face brick sills
4. Gable/s
5. Blade wall
6. Balcony

The upper floor of two storey dwellings should be setback from the ground floor building line to reduce the impact on adjoining properties and avoid a “boxy” appearance.

Balconies are required for a 2 storey dwelling.

Features which serve a purpose are encouraged; planter boxes are not considered to be a feature

2. Façade Materials

To provide visually interesting facades we require that a combination of materials be used.

The primary material for the façade shall be render, single brick, HardiePlank™ and other materials considered by the developer based on merit.

The façade should include a contrast feature to a min of 10% and max of 25% from the materials below:

- Single or 2c face brick
- Tiles
- Cladding - timber or stone
- Corrugated iron
- HardiePlank™
- Render

Two render colours only will not comply.

The façade excludes the roof, gutter, downpipes, windows, brick planters and the garage door.

The façade colour palette is included to keep the estate looking consistent.

Facade - Primary

Facade - Highlights

3. Windows

All front windows must be clear glazed and to be of a pleasing proportion, they can be rectangle or square in shape.

1. Awning
2. Casement
3. Sliding

Note: Roller shutters are not permitted on the front elevation windows. Or if a corner lot they are not permitted on the side elevation forward of the side boundary fence

4. Roof

Where a sloped roof is proposed, the roof visible to the street(s) must be a minimum 25-degree pitch for the main roof. Gables are permitted within the roof scape.

A skillion roof is permitted. There must be a visible overhang to the skillion roof. A flat topped parapet wall to a sloped roof behind is permitted where the roof is fully concealed from the street(s).

Roof materials shall be corrugated (i.e Colorbond) in colour tones that match approved colour palette.

Roof tiles are not permitted in Harrisdale estate

Plain zincalume roof cover is not permitted.

Colours - Colorbond

5. Doors (Front)

Front entry doors are required to include any type of glazing or to include a sidelight. This provides passive surveillance to the front of the home. The exception are lots which are 7.5m or less, where a defined path to the entry door will suffice.

6. Corner lots

The dwelling shall address both street frontages and include at least one major opening from a habitable room with a clear view of the secondary street and not be obscured by fencing.

If a brick or rendered finish is on the primary street then this same finish needs to continue to the secondary street up to 1.5m. This will improve the secondary streetscape and will enhance the appeal of the estate.

Fences on corner lots are to finish up to brick or rendered feature finishes or where possible 1 metre behind the front of the building line.

Meter boxes should, where possible, be located on the side opposite the corner, unless this is a zero lot wall. In this instance the meter box can be positioned at a minimum of 500mm from the front corner.

7. Garages and Carports

Except on laneway lots, a garage must be incorporated into the main building and include a fitted sectional door in a colour to complement the dwelling.

The garage is to be setback at least 500mm behind the house front not including porches, verandahs, blade walls or any other features.

The garage must accommodate 2 cars with a minimum area of 30m².

Carports are permitted for laneway lots only and shall include a solid garage door.

Trailers, caravans and boats atored on the property should be screened from view of the street.

Garage should not be level or in front of the main house

8. Driveway and Crossover

The driveway and crossover shall comprise of brick paving, liquid limestone or exposed aggregate and finished in materials and colour tones to complement the dwelling appearance unless otherwise approved by Cedar Woods.

Grey or coloured concrete to driveways or crossovers are not permitted.

Crossovers and garage levels to be in accordance with the City of Armadale.

9. Letterboxes

The letterbox shall be designed and finished in materials and natural colour tones to complement the dwelling appearance.

Pier format letterboxes are encouraged and novelty letterboxes are not permitted.

Where front fencing is erected, the letterbox design should be integrated into the fence design.

10. Outbuildings, Utilities and Facilities

Outbuildings, sheds, meter boxes, bin storage areas, drying areas, air conditioning units, solar hot water systems, satellite dishes, TV antennae are not to be on the front elevation, unless designed to complement the dwelling or concealed from view through use of appropriate screening.

All Air conditioning units, solar hot water systems are to be of a similar colour to the surrounding roof or building material and are not to be located above the peak ridge of the roof of the main building. On north facing lots any solar hot water systems should be ground mounted units only.

Where a rainwater tank is visible from the front street, it must be incorporated well into the design or appropriately screened.

Structures greater than 25 square metres shall be constructed in the same materials and finishes to match the house.

All piped and wired services are to be concealed from public view.

Front Fencing and Landscaping

Cedar Woods provides front landscaping and side and rear fencing (excluding side gates or fencing between the house and side fence) to compliant designs, completed on or before 24 months after settlement.

The landscaping provided excludes any 'hard' landscaping materials such as paving, planter boxes, or ornamental features.

The boundary fence will be installed 1 metre behind the front of the building line.

Owner installed front fencing is permitted but only to a height of 900mm above the lot level. If 1200mm high is required then the fence should be at least 50% visually permeable.

The colours and materials are to complement the dwelling, while still maintaining the feel of the estate.

Fencing to corner sites is to be provided by Cedar Woods and should maintain an interactive street frontage for at least the first 4m from the minimum front building setback line. These fences are to be a combination of masonry or other materials as determined by Cedar Woods.

Additional Design Considerations

Ask your builder about some other additions such as the ones below. These will cost a little more up front, but the potential savings could save you much more in the medium to long term. These items are not mandatory at Harrisdale Green but are included for your consideration only.

Climate responsive design

The cheapest way to ensure your home is energy efficient is to lay it out right. This should not add cost to your home - select a house plan which meets as many of the following elements as possible from the following list.

- Living rooms to be on the north facing side of the dwelling. If the lot faces north-west to north-east, then the living rooms can be on the east or west sides
- Bedrooms on the southern side of the dwelling
- Alfresco areas or patios to be on the east or west sides of the dwelling
- Utility rooms, store rooms, bathrooms and garage/carports to be situated on the east and west sides of the dwelling as much as possible
- Windows minimised (e.g. not to the floor) on the east, west and south sides of the dwelling or larger windows to have e-glass, double glazing or similar
- Larger windows to have awnings, deep eaves (450mm+), e-glass, double glazing or similar
- Windows to be maximised on north facing walls
- Ensure roof insulation extends to the eaves
- Use wall insulation
- Ensure breezes can flow through the home
- Tiles, linoleum or concrete floors encouraged to north or west facing living rooms
- Plant gardens which will protect the windows in summer and allow the sun in through the winter.

Renewable Energy

Renewable Energy takes advantage of nature systems, most commonly the sun, for the production of electrical energy and water heating. Incorporating an appropriately sized photovoltaic PV system and solar water heater to match your home and family's needs can go a long way to offsetting much of your energy demand over the year.

Key renewable Energy elements include:

- Photovoltaic (PV) system
- Solar (with gas or electric booster) or Heat Pump hot water system.

In-Home Energy Efficiency

In-home energy is a significant part of your total energy consumption. Choosing efficient appliances such as fridges and washing machines, and fixtures (such as ceiling fans and air-conditioners) can significantly reduce your energy bills.

Peak load is the increased demand for electricity mainly during summer between 3pm and 9pm. This occurs when most people are at home using multiple appliances such as TVs, computers and air conditioners. You can reduce your peak load demand by including smart meters and having peak load control devices fitted to fixtures and fittings.

Key Energy Efficiency elements include:

- Energy efficient, peak smart air conditioners
- Ceiling fans to living areas and bedrooms
- Energy efficient lights - LED or fluorescent (CFL's)
- Automatic lighting sensors

Water Use and Efficiency

Alternative Water and Water Reuse

The installation of alternative water systems can significantly reduce your water bill as well as preserve water availability for the future. Harvesting and the reuse of rainwater can greatly reduce scheme water use. The best use of rainwater is to have the tank plumbed directly to toilet flushing and for cold water to the washing machine. Greywater systems reuse laundry and shower water for garden irrigation.

Key Alternative Water and Water Reuse elements include:

- Rainwater tank plumbed to laundry and toilets
- Grey water system to irrigate garden areas

Liveability

Liveable or safe and accessible homes are designed and fitted-out to allow ease of access and use for all people, including those with limited mobility, the aged, people suffering injuries and children.

Key Liveability elements include:

- Level, well illuminated entry
- Accessible, well illuminated car parking and pathways
- Wide doorways and passages (minimum 820mm wide)
- Accessible toilet and bathroom with semi recessed hand basin and hobless (step-free) shower Minimum open flooring of 1.6m x 1m in the toilet and 2.3 x 2m in the bathroom
- Lever door handles
- Power points no lower than 30cm from the floor

Additional initiatives

Additional methods to reduce the long term sustainability include:

- thermal performance exceeding the BCA minimum 6 star requirement;
- use of framed construction with light weight cladding (less embodied energy, better thermal performance, higher recyclable content and reduced footings compared with brick construction); or
- inclusion of ancillary accommodation to increase the design life of the building and make it more adaptable to the changing needs and circumstances of the occupants
